

MoneyWorks Gold

MoneyWorks Gold is a fully featured accrual accounting system that combines ease-of-use, flexibility and power with a low cost of ownership. As well as offering robust accounting, MoneyWorks Gold includes advanced features such as cost-centre accounting, time billing, multiple currencies and fast multi-user access. You'll save time and get better information if you use MoneyWorks Gold.

- Fully integrated cashbook, invoicing & general ledger
- Automatic handling of sales tax
- Time billing and job costing
- Multiple currency support
- Inventory, backorders and order/quote processing
- Powerful report writer to create the reports you need
- Design your own invoices and statements
- Comprehensive enquiries and reports
- Multi-user capable with fast network performance

Overview

MoneyWorks Gold is an advanced multi-user capable, accrual accounting solution for larger organizations, or businesses with special accounting requirements. As well as all the features in MoneyWorks Express, it has a wealth of functions normally only found in packages costing thousands of dollars, including departmental (cost centre) accounting, detailed inventory management, job costing with time sheets and powerful report writing capabilities. Gold is 100-percent cross platform, running on and seamlessly between Mac and Windows.

Your business information system

MoneyWorks Gold is more than just an accounting system. It incorporates a very powerful database providing incredibly easy ways to search, sort, and analyze your business data. The powerful report writer enables you to extract the information you need, when you need it.

Multi-user ready

MoneyWorks Gold comes with a single user license. But as your business expands, it's easy and cost-effective to add more users with affordable license keys available from MoneyWorks. The modern, high-performance network database engine provides incredibly fast network performance, even on mixed Windows-Macintosh networks. In addition, MoneyWorks Gold incorporates comprehensive privilege control so you can protect sensitive information from unauthorized access.

A Platform for Growth

MoneyWorks Gold is the ideal platform for the growing business; for example, there are no arbitrary limits on the number of records (100,000 products, no problems). Because MoneyWorks was designed to interoperate with other systems, it can be linked to custom front-ends in

FileMaker, CRM systems such as Daylite, or even your web store. For larger sites, MoneyWorks Gold is file compatible with the server-based MoneyWorks Datacentre.

Easy to Use

The friendly and intuitive interface makes MoneyWorks Gold easy to learn and to use. There's a comprehensive tutorial that takes you step by step through the main features that you'll use. And if you need additional help, MoneyWorks comes with a comprehensive manual written in plain English.
